

Invitation to: First Split Workshop in Atmospheric Physics and Oceanography (SWAP), May 22 - May 31, 2009 Split

Short description: The most prominent and prestigious international scientists will teach a few of the best students from the region as well as their international colleagues in the vigorous areas of atmospheric and oceanographic science (detailed timetable is attached). The topics will combine the fundamental knowledge as well as specific issues of modern research. Through innovative lecturing techniques and close interaction with professors, the students will be exposed to the ideas not heard in their regular education. The students will have the opportunity to establish international scientific collaborations.

The workshop is on the graduate level, but in exceptional cases of sufficient knowledge in Physics undergraduate students, domestic and international, can participate. The workshop language is English. The attendees that successfully finish the workshop will be accredited for maximum of 20 ECTS points (assigning for e.g. 10 ECTS points will be possible too).

The students will participate in discussions and hold independent seminars. The scientific papers that the students are assigned to read and prepare will be given three months in advance.

We can cover your stay up to the amount of 1500 Croatian kunas (300 US dollars) and part of your trip to the amount of 400 kunas (80 dollars).

For applications and questions please contact: Zeljka Fuchs at zeljka@pmfst.hr.
